Vestal's Special Mixture Southern States Evergreen Lawn Grass Seed

Southern States Evergreen Lawn Grass Seed For the convenience of those of our customers who object to the Bermuda Grass, we have decided to offer them this year **Southern States Evergreen Lawn Grass Mixture**. A mixture of the best grasses that exist for general planting in the Southern States. Most lawn grass mixtures are of little use in the South, as they burn out in dry summers.

Vestal's Evergreen Lawn Grass Seed is a well balanced scientific blending of the best American grasses which will flourish under varied and adverse conditions of soil and are by nature adapted to hot, dry climates. It quickly produces a firm, deep velvety and elastic turf and holds its beautiful emerald green color throughout the season.

By using Vestal's Evergreen Lawn Grass Seed and with some care and attention to watering, an all-the-year-round lawn can be maintained in the Southern States where lawns generally do not thrive. For a plat 15x20 feet, or 300 square feet, use one quart. Price, delivered free, 45 cents per quart; \$1.25 for 3 quarts; \$2.00 for 6 quarts.

Information for Purchasers

WHEN YOU ORDER, please use the printed envelope and order sheet enclosed. Others will be sent you upon request. Always write your name the same, adding the postoffice, county and state on each and every communication you send us. If you have occasion to write us, please use a separate sheet.

LOST OR UNSIGNED ORDERS. Letters are often sent us unsigned and letters are sometimes lost in the mails. If you do not hear from us within a reasonable time, please send us a duplicate of your order, stating when and in what form payment was sent, and sign the name and address the same as in the first order, so that it may have immediate attention.

HOW TO SEND MONEY. Our terms are cash. To avoid delay please send money with order. Money may be sent at our risk if forwarded by P. O. Money Order, Express Money Order, Bank Draft or in Registered Letter, and cost of same may be deducted from amount forwarded; but we cannot be responsible for any order or money that fails to reach us when not sent as above directed. CASH should be sent by Registered Letter, but coins should be carefully wrapped and care taken to seal letter securely. New postage stamps accepted for small amounts.

ORDERS WILL NOT be sent C. O. D. unless one-third is sent with the order as an evidence of good faith.

AGENTS. We employ no agents and are only responsible for orders sent direct to us.

ERRORS. As an evidence of our human failings we sometimes make mistakes. Careful as we are to protect ourselves and our patrons, preach as much as we will to our employees, yet they occur; when they do, notify us at once; we will correct them promptly.

SHOULD YOU RECEIVE two or more catalogues alike, which sometimes occurs, have the kindness to present such

as you do not need to others who will likely want plants. By doing so confer a double favor. We will also feel thankful for your recommendations of our establishment to your friends wanting plants. A copy of our Catalogue will be furnished to friends requiring plants on receipt of their address.

WHEN SENDING CLUB ORDERS please give full name and address of each member of the club, so that we may enter their names on our books and forward them our Catalogues as issued.

BETTER THAN WE PROMISE. We always do better than we promise in the way of extra plants, so when the order will at all afford it we add to it some plant or plants gratis, often choice new kinds; several of the Roses now so eagerly sought after were first introduced to our customers in this way—presented with their order.

ORDERS BY EXPRESS. Two-year-old Roses, large size shrubbery, fruit trees, etc., are too large to mail and must be sent by express. We recommend that customers instruct us to ship smaller size plants also by express, when in our judgment it is best to do so. We can send larger plants this way and can leave most of the earth on roots, which is, of course, much better for our customers. **Express charges must be paid by the purchaser,** unless otherwise agreed. But we are careful to pack as light as safety of the plants will permit and add as many extras as we can afford to help cover charges, and since the expressage on plants, bulbs, etc., is now twenty per cent less than regular merchandise rates, the cost of sending goods in this way even to distant points, is quite reasonable.

WE GIVE CLOSE personal attention to every part of our business and are always glad to assist our customers in every way we can.

NON-WARRANTY.

While we hold ourselves in readiness, on proper proof, to replace free of charge all trees, etc., that may prove untrue to label, or refund the amount paid, we give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any nursery stock, seeds, bulbs or plants, we sell.

OUR GUARANTEE.

All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors and the carrier as well, if any damaged stock. This guarantee not good unless above requirements are complied with. **WE DO NOT GUARANTEE GROWTH.** Remember a tree, shrub or plant is a living organism, as much as a cow, horse or man. It breathes, drinks and feeds and is liable to attacks of disease and insects. At prices we sell, it is impossible for us to guarantee growth or to be responsible for stock after delivery to our customers in good condition.

VESTAL ROSES AND HOW TO GROW THEM

"He who would have beautiful Roses in his garden must have beautiful Roses in his heart. He must love them well and always. He must have not only the glowing admiration, the enthusiasm and the passion, but the tenderness, the thoughtfulness, the reverence, the watchfulness of love." So wrote Dean Hole, the rosarian of beloved memory.

WHO SHOULD PLANT ROSES

Everyone should plant Roses. There is no home, worthy of the name, where space could not be found for from ten to one hundred Rose bushes. If a renter, plant Roses; you will get returns in beautiful flowers in from two to three months. If a flat dweller, and you have three or more windows, you can plant ten or more Rose bushes in window boxes. The results will be a delight, and you can move the window boxes with other personal belongings, when moving day comes around. If a home owner, it matters not how pretentious or humble, nothing can make it more home-like, more attractive and inviting, than a well-selected Rose planting. If a landlord, there is no improvement that can be made at so small an expenditure that will so quickly enhance the rental value and desirability of property, insuring permanent tenants, as a good Rose planting.

SOIL

Amateurs sometimes think that planting Roses is a serious job and one to be approached with fear and trembling as to probable results. This is not at all true, as it is a job which does not need an expert, and may be done quickly.

While Roses may be grown in any good soil, they flourish better in a rather clay loam than they do in light or sandy soil. To those not acquainted with soils, it will be well to explain that almost any soil that is not sandy or gravel may be classed, in a general way, as clay, and if it is good enough to grow good farm crops or garden vegetables, it is good enough to grow Roses, and does not need the addition of any great quantity of manure. Application of enough manure to just cover the soil from sight is usually sufficient, unless the soil is quite poor to start with. Good stable manure is the best; it should not be too fresh, but at least partly rotted. If you can not procure this, the dried cattle and sheep manure that is now sold in sacks is good.

Many amateurs make the mistake of having their Rose beds too rich. We knew of one who took out the original soil to a depth of two feet, filled in the bottom of the trench with eight inches of manure, packed solidly, and finished with soil which was one-half manure. This is entirely too much manure, and Roses planted in such a bed would not be likely to remain healthy for any time. Even had he left out the manure at the bottom, the soil would have been too rich as one-fifth or one-fourth manure is enough. We do not advocate placing clear manure at the bottom of the bed, though some planters have had fair success in making beds that way. Any soil you get must come from the surface; that is, the first six inches of a good field or garden. It is not well to use chip dirt, woods' earth or rotted leaves with Rose soil; such material is good for many plants, but not for Roses. Of course, the manure used when Roses are planted will become exhausted and must be replaced by a top dressing of manure; or fine ground bone may be applied at the rate of three pounds to the square yard. As a rule, this top dressing should not be applied more often than once a year. If your soil is very poor or has been filled in with brick bats and refuse, as many city lots are, it would be best to remove it entirely to a depth of eighteen inches and fill with good soil that is fine and mellow and properly mixed with manure.

Archway of Roses

The best time to apply manures is just as the ground begins to freeze in the autumn; let it serve as a protection over winter and dig it in next spring. Even with the best care it may prove necessary at times, say after six or eight years, to renew the Roses or move the bed, adopting the farmer's principle of rotation of crops.

TIME TO PLANT. The proper time for planting in the various sections of the country largely depends, first upon the location and, second, upon the character of the plant. In the warm climate, southern and southwestern states, in fact all sections where frosts are infrequent and the winters mild, pot-grown as well as dormant Roses may be planted in the late fall, as well as in the early spring. In the southern states fall planting of both these classes of Roses is considered desirable, but, if the conditions are such that it can not be accomplished, then in the early spring months they may be set out with entire safety.

COMPARATIVE VALUE OF ROSES

Don't think any Rose too small to do well. The roots of one-year plants being carefully protected in pots, permits of the shipping and successful planting anywhere. Roses of this size are to be recommended for all Rose growing sections. If you wish the largest and best Roses for quick effect, then Roses of the two-year size from four to five-inch pots are to be recommended.

ADVANTAGE OF POT-GROWN ROSES

There is another advantage in planting pot-grown Roses; namely, that they can be planted at any time of the year. The ball of earth contains all of the fine fibrous roots, and when the plants are shipped, transplanting can be done with no more injury to the plant than if the Rose had simply been removed to a larger sized pot. The growth continues just the same and the roots do not have to establish themselves, as is the case with the dormant plants. The pot-grown Rose, therefore, has many advantages over other Roses.

MULCHING. The main object being to retain the moisture rather than to enrich the soil, cultivate the garden once a week up to the middle of July, to maintain a dust mulch; after that, a liberal covering of "long" cow or horse stable manure that will not heat will accomplish this purpose best.

HARDINESS. Hardiness in a Rose is a matter of which no one can speak with positive certainty, because the condition of the weather as a rule prescribes the hardiness of a plant, as quite frequently plants that have been out year after year will be winter killed by unusual conditions. As stated elsewhere, the

hardiness of the different varieties of plants can be depended upon to be as near accurate as it is possible for anyone to determine.

WINTER PROTECTION. Where the temperature gets below freezing, the less hardy Roses will require protection, and all of them will be the better for it, at least about the roots. Soon after the first frost, having hilled up the soil around the stems, cover the Rose beds all over with a 3 or 4-inch layer of good heavy stable manure, and over this a 6-inch layer of leaves, held in place by the most slightly material available. A 12-inch fence of poultry wire will keep the leaves in bounds nicely. If the leaves are not available, straw,

Plants protected in a barrel covered with burlaps

corn-fodder and even boxes put over the Roses to shed the rains, will protect from the cold, biting winds and the alternate freezing and thawing of early spring sunshine and cold nights; but do not smother the Roses, for if too tightly covered they will die. Remove the covering gradually in the spring when danger from frost is past.

TREATMENT ON ARRIVAL. When you receive the Roses, give them the greatest care; never expose the roots to the drying action of spring winds for a moment. A plant with bare roots exposed to the dry air is like a fish out of water. Should the plants, through delay in transit, come dried out, as occasionally happens, soak the balls of earth and roots in water; if the stems have dried out, after soaking the ball, bury the whole plant in damp earth for several days. This treatment may put them in good condition, while if they are planted when dried out there is danger of their dying.

HOW TO PRUNE YOUR ROSES

Pruning is the art of improving the productive power and the appearance of a plant. It consists of two distinct operations. 1. The removal of dead, weak, overcrowded, and otherwise useless shoots. Unripe wood which in the spring will usually be found to have discolored pith, caused by the winter frosts, should be cut clean away at the base of the shoot. 2. **Pruning Proper**, the shortening of those shoots which are allowed to remain after the thinning-out process has been completed.

The most frequent errors made in pruning are: (1) leaving too many shoots when thinning out; (2) pruning severely the shoots of varieties which require little, if any shortening; (3) pruning lightly the varieties which require severe pruning; (4) leaving Rose plants crowded with shoots and cutting these to a uniform length all over the plant in a similar way that a hedge is clipped.

In thinning out a shoot, it should be either cut clean away to the base of the plant, or to its starting point on the elder shoot from which it springs, as the case may be. When the plant has been pruned, the shoots should be left as nearly as possible equidistant from each other, and regularly arranged around it so that it presents a well-balanced appearance on all sides.—National Rose Society's Handbook on Pruning.

ROSES HURT WITH THE WINTER. When Roses are hurt with the winter, cut all the injured branches off down to the live wood, and if you have "Own Root Roses," and the roots are not hurt, they will soon throw up newshoots and bloom as well as ever.

DISEASES AND INSECTS

MILDEW. This disease very frequently attacks the foliage of Roses, especially the Crimson Rambler. It is shown by a grayish crinkling appearance of the leaves and usually occurs after a change in the temperature. It can be checked to a certain extent by sprinkling the leaves with powdered sulphur immediately after its appearance, or better still, use the Bordeaux Mixture as a preventive.

RED SPIDER. Is also a small insect indistinguishable to the naked eye, and a frequent spraying with a strong hose is all that is necessary.

ROSE BUG. A familiar insect, appears in the earliest summer, sometimes in great quantities, and very troublesome. It is a very destructive insect and usually feeds upon the white petals, but is easily destroyed, especially in the early morning, when they will readily fall into a vessel containing kerosene. They can be poisoned, but it is not a very desirable way to get rid of them. This is to spray with wood alcohol, which will kill any insect by contact, operates quickly and does not injure the flower if applied in a mist-like spray. Care should be exercised by the operator not to inhale any of the fumes.

GREEN AND BLACK FLY OR APHIS. A green sucking insect which usually gathers in great numbers upon the tips of the new growth. A solution of tobacco made from tobacco insecticide soap, will exterminate them.

LEAF ROLLER. Is an insect of yellowish-white color, resembling the butterfly, and lays eggs on the under side of the leaf, which soon form a cocoon, rolling around itself the leaf, hence the name, leaf-roller. Arsenate of Lead is the remedy.

BLACK SPOT. A fungus disease, appearing as its name indicates as a black spot upon the leaf, eventually turning yellow and falling. It rarely occurs in the early part of the season, and the Teas are almost but not quite, exempt from its ravages. The best preventive if your bushes have been troubled by it in the past is spraying in April before the foliage has developed and not while the flowers are in bloom, because of the discoloration of the foliage. The disease usually appears at the base of the plant and works upward, so a watch should be kept and as soon as any leaves appear affected with this disease they should be pulled off and taken entirely away from the balance of the plants. If this is thoroughly done it will usually hold the disease in check. Use Bordeaux Mixture as a preventive.

ROSE PREMIER

Remarkable For Its Large Size, Clear Color, Sweet
Fragrance, Free Growth, and Luxuriant Foliage

PREMIER is a cross between Ophelia and Russell. It resembles the former in its strong thornless stems and quick growth. Its ample foliage is similar to that of Ulrich Brunner and in arrangement and size of leafage it possesses the character of American Beauty. Premier is truly a big Rose that is ideal among the ever-bloomers; its stiff stems hold the immense flowers upright and what is more remarkable, the stems are almost free from thorns, the upper stem especially being thornless. The flowers are of Russell type, large and broad petaled, of glorious rose pink color, and grand in form. The foliage is large and durable and beautifully set, the leaves broad and dark green, making a fitting background for the fine bloom. To crown its other perfections it has a delicious June Rose fragrance, which is most enchanting. It produces quantities of blooms during the season and seems to claim the Premier place among American Roses. Price, strong one-year-old plants, 30 cents each; two-year-old 75 cents each.

Rose Premier. A Glorious New Rose

PAUL NEYRON

"Among the Foremost Roses of the World"

Price, one-year, 30 cents each; large two-year \$1.00 each.

It is delicately pure tea perfumed. Price, one-year, 20 cents each; two-year, 60 cents each.

A NEW FANCY COLORED ROSE

MADAME BUTTERFLY. A glorified sport of Ophelia with all the colors of Ophelia intensified, making it a harmony of bright pink, apricot and gold. A free grower and bloomer with large handsome foliage free from mildew. It averages more petals to the bloom; it produces more blooms to the plant, because it makes more branches, every one carrying a bud. The buds are a lovely shade of Indian red, yellow at the base; they are unique for corsages and for low table decorations; the opening flowers are perfect in form and texture, clear and brilliant in color, and of delicious fragrance. Price, one-year 30 cents each; two-year, 75 cents.

A NEW WHITE ROSE

MRS. JOHN COOK. White, suffused with delicate pink, describes the color of this strong-growing big-flowered beauty. Bud is long and shapely, opens perfectly to a full double flower, petals are of fine texture and substance. Blooms freely and is destined to take front rank among white Roses. Price, 35 cents each; two-year-old plants, \$1.00.

ROSE HEDGES

Almost everyone who can find any place at all to put it wants a hedge of Roses. There is something both typical and romantic about the idea of Hedge Roses that strongly attracts every one. We can supply any of the fine Bush Roses in quantity for hedges, and any of the beautiful Trailing and Climbing Roses for covering walls and fences.

NEW GOLDEN YELLOW ROSE

CITRONELLE

THE ONE BEST GOLDEN YELLOW ROSE. For years Rose-growers the world over have sighed for the advent of a genuinely golden yellow, hardy, everblooming Bush Rose. Last year we secured this wonderful Rose. Instantly it was hailed with delight, for it represented a new color in its class, and since its introduction it has become one of the three best-selling Roses in our entire collection. Over 100,000 plants, in as many different homes, have demonstrated beyond a question of doubt that this is the greatest of all golden yellow Roses for the home planter.

It grows to perfection in almost any ordinary soil in all sections, and from the time it is planted in the early growing season, it bears continuously great numbers of lovely flowers of immense size, elegant, full, deep and double on stiff, erect stems, which stand out well above the plant, giving it a regal appearance and stamping it as the most extraordinary Rose of its color yet introduced.

The color of the flowers is deep golden yellow. Now and then in the early stages of development its petals have faint streaks of pink, but as the flower develops fully, it is pure golden yellow without a blemish; in short an eighteen-karat flower of sterling merit. Price, one-year 35 cents; two-year \$1.00 each.

MRS. DUNLAP BEST

In bud form this Rose appeals to every one on account of its wonderful color, which is entirely distinct from and not found in any other Rose, a vivid orange-red, with coppery-red and apricot shadings, opening bright salmon, and which is further set off by the healthy, glossy, bronze-green foliage; delightfully fragrant; a vigorous grower and very free-flowering. A great bedder. Price, one-year 20 cents each; two-year 75 cents each.

Madame Eugene Marlitt

Its color is a deep crimson overlaid velvety crimson, shading to vermilion toward the edges. Buds long and pointed on stout stems, opening full and double, each one coming to perfection, and produced in marvelous profusion throughout the entire season. Plants make a gorgeous sight owing to the brightness of the blooms and the luster of the foliage, being entirely free from mildew. Price, one-year 20 cents; two-year 60 cents.

Jos. W. Vestal & Son, Little Rock, Arkansas.

Dear Sirs: The roses arrived in good condition, excepting one, the Francis Scott Key, the dirt having shattered off and it was dry. I immediately put it into a basin of water, and from the appearance today believe it will grow. Was that not a splendid record of plant shipment? Six dozen and only one dry in the lot.

Thanking you for your kindness and the promptness with which the order was dispatched, I remain,

Very truly,

April 26, 1921

Mrs. E. B. R., Denver, Colo.

GRUSS AN TEPLITZ

The Sweetest, Richest Crimson Hybrid Tea Rose

Called by some growers Virginia R. Cox. The intense, dazzling color of this Rose is found in no other variety. Fiery crimson, shaded with a dark, velvety sheen, totally unlike any other color in the world. Large, handsome, moderately double flowers. Produced in wonderful profusion throughout the whole growing season; in fact, it is always in bloom. The flowers are produced singly, sometimes in clusters, producing a gorgeous effect on the lawn or in the garden all summer through. The fragrance of Gruss An Teplitz Rose is unexcelled by that of any other variety under cultivation. It is a strong and sturdy grower, often attaining a height of four or five feet, is perfectly hardy in all sections and is one of the finest of many splendid Roses that have come to us from Europe. Price, 20 cents each; two-year-old plants, 60 cents each.

KAISERIN AUGUSTA VICTORIA

In describing this Rose we might say it is large and very large. Some of the flowers have as high as sixty petals and sometimes more, opening to a very high center. In color it is a most magnificent red. It is very easy to cultivate and requires little or no care. This makes an ideal Rose for your garden and is extremely showy when a number of these plants are massed together. Price, 25 cents each; two-year-old plants, 75 cents each.

HELEN GOULD

It has proven itself to be the strongest growing, freest blooming, largest flowering and hardiest rose in existence. It is a better Rose for general planting than American Beauty—the dream and hope of every Rose grower for years past. A strong, dwarf, compact grower, absolutely free from disease of all kinds, young plants blooming continuously throughout the year. The flowers are as large as the American Beauty, are full and perfectly double; the buds are beautifully made, long and pointed, produced on long, stiff, erect stems. The color is a warm rosy crimson, the color of a ripe watermelon. Price, 20 cents each; large plants, 75 cents.

COLUMBIA

GIGANTIC IN SIZE—FREEDOM IN BLOOM

Could be rightly called the **Giant Pink**, owing to the enormous blooms it produces. Of distinctive merit, being an extremely strong, rank grower, one of the strongest of the everblooming, blooming as it does with the greatest freedom, the buds carried on long, stiff, erect stems, of the very largest size imaginable in a Rose bloom, open flowers often measuring six inches across, full of petals and of wonderful depth, which it retains in perfect formation. Very fragrant. Color, clear imperial pink, on the order of **La France**, deepening as it opens to glowing pink. A peculiarity of the variety is that the shades all become more intense until the full maturity of the open flower is reached, and this color is enduring. Being fully double makes it a fine summer Rose, particularly adapted to garden culture. We feel that after all is said, we have not said half enough for **Columbia**. Price, one-year, 20 cents; two-year, 60 cents.

PRESIDENT CARNOT

It is a Rose of the largest size, beautiful both in bud and open flower. The buds come on long, stiff stems, in clusters of from six to twelve. Each individual flower stands out distinct on its stem. No crowding as in the case of so many Roses that bloom in clusters. The color is distinct and novel, a lovely fawn, shading to pearl. It often measures five to six inches in diameter. We have no hesitation in saying that this charming Rose will become as popular as **La France**, as it has all the good qualities of that Rose, and at the same time is so distinct that it attracts immediate attention. It is, indeed, a wonderful Rose—one that everybody can grow and bloom. Price, fine young, strong plants, 20 cents each; fine two-year-old plants, 60 cents each.

OPHELIA

"A Rose of Attractive Coloring"

In this magnificent Rose, we find a Rose of attractive coloring. It might be described as salmon-flesh shaded rose. The bloom is quite full, unusually long and beautifully pointed with petals of wonderful depth and substance, retaining their shape longer than most Roses. The variety is of fine branching habit and ideal growth, a beautiful and most bushy Rose. Its color is not its only charm as its fragrance fills the room with a delicate pure rose perfume. It ranks one of the best of the garden Roses. The illustration conveys but a faint idea of its beauty and formation, which is of large and perfect shape. Habit excellent, growth strong, produces flowers on long stems, well up above the foliage, and in great profusion all summer. Hardy in almost all localities. Grand for forcing or outdoors. Price 20 cents each; two-year-old plants, 60 cents each.

ANTOINE RIVOIRE

"A Garden Rose of Great Merit"

(Summer blooming, hardy with protection). A great favorite in the South; sturdy in growth; branching in habit; free flowering as a Geranium; charmingly shaded rosy-flesh color, on yellow ground with a delicate border of carmine; flowers sweetly fragrant. Price, one-year-old plants, 20 cents each; two-year-old plants, 75 cents each.

The combination of colors in the salmon-yellow Rose Ophelia makes it a highly decorative variety

JONKHEER J. L. MOCK

The Giant Pink Rose

This sensational Holland production is in a class of its own. It is a true Hybrid Tea with gigantic flowers on great, erect, stiff stems and a growth that is marvelous in its freedom. It is the greatest bush Rose of any color for American gardens that has come out of Europe in the past fifty years. Well named the "Giant Pink Rose." Price, one-year, 15 cents; two-year, 60 cents.

PRESIDENT TAFT

It is without question the most remarkable of all pink Roses. It has a shining, intense deep pink color possessed by no other Rose. It is a fine grower, free bloomer, good size and form, fragrant, and in a class by itself as to color. Mr. Frank Good, who is probably familiar with more Roses than any man in America, says: "Talk all you want to about the Rose President Taft, and then you will not say enough." Price, one-year-old plants, 20 cents each; two-year-old plants, 60 cents each.

ETOILE DE LYON

This magnificent Tea Rose is a rich, golden yellow; a strong, healthy and vigorous grower; immense bloomer, bearing flowers and buds early and late. Flowers are very deep, rich and full, excellent substance, very sweet. Surely one of the best and most beautiful yellow Tea Roses for general planting ever introduced. Remarkably hardy, both as to heat and cold; frequently standing the winters here uninjured in open ground without protection, and blooming nicely all through the hottest part of the summer. Price, 20 cents each; large two-year-old-plants, 60 cents each.

PINK RADIANCE AND RED RADIANCE

In the Radiance Roses are found all the good qualities that go to make an ideal garden Rose—grand size, handsome form, free flowering, hardiness, pleasing colors.

RADIANCE

MAGNIFICENT ROSE

(Giant Flowering, Handsome in Form and a Wonderful Garden Rose.)

This grand, giant-flowering Rose stands head and shoulders above all other Roses of its class. The flowers, which are of splendid form, are large and full and somewhat of the June Rose type. The buds are particularly handsome in form, the full blooms large and double, the petals of immense size and the blossoms are highly perfumed. The growth of the plant is vigorous, making strong canes which are thick and heavy. Radiance is rightly considered a leading Rose of the garden for cutting and successfully competes with many of the finest greenhouse productions as a cut-flower variety. Radiance produces a wealth of heavy, clean, dark green foliage and has the qualities that make it the ideal garden Rose. Price, strong plants on own roots, 25 cents (will bloom the first season); two-year-old plants, 75 cents each.

RED RADIANCE

No Rose has yet equalled, certainly none has excelled Radiance as a garden Rose, when all points are taken into consideration, such as hardiness, freedom of bloom, vigorous growth and character of bloom. In Red Radiance we have an exact replica of its prototype, Radiance, except in color and bud. The color is an even shade of clear red, without a trace of any other color, retaining its vividness for an unusually long time after being cut. It is a remarkable bloomer, being constantly in flower, from early spring until freezing weather. Strong, vigorous, branching grower, each branch terminating in a large bold, double bloom. Hardy everywhere. Altogether it is a Rose destined to become one of the leading garden Roses of America. Price, one-year, 25 cents each; two-year, 75 cents each.

BEAUTIFUL YELLOW ROSE LADY HILLINGDON

"Everybody Can Grow It."

It has long willowy stems that are in no sense weak, as the buds are held upright; has a long slender pointed bud of brilliant deep golden-yellow, and a striking peculiarity of this Rose is that each day the golden-yellow color becomes deeper yellow and more intense, unlike all other yellow Roses of which we are familiar, as invariably the tendency after being cut is to get lighter in color. MADAME JULES GROLEZ

Red Kaiserin Augusta Victoria

Mme. Jules Grolez is an exceedingly free-blooming variety, with very large, finely formed flowers. The color is a distinct and charming shade of cherry-red. The fine form and attractive shape of the flowers makes them excellent for cutting. Like Kaiserin Augusta Victoria, Mme. Jules Grolez is a Rose of great value for open-ground culture. MADAME PAUL EULER

Out in California and the Pacific Coast this Rose is so well thought of that it has been rechristened "Prima Donna." The color is a lovely shade of deep rose-pink, petals waved or undulated on the edges, giving it an elegance of form seen in no other Rose. Good for forcing or outdoor growing. Price 20 cents each; two-year, 60 cents.

MADAME ABEL CHATENAY

Further trials each year only serve to strengthen our belief that this is one of the greatest Hybrid Tea Roses of its type; color, rosy carmine, with darker shadings; reverse of petals pale salmon. Splendid in the open ground, where it is absolutely hardy. Beautifully formed flowers, full, deep and double. A strong grower and a free bloomer. Price, one-year-old plants, 20 cents each; two-year-old plants, 60 cents.

Over 200,000 satisfied buyers can and do testify to the fact that our famous Vestal "Roses," all on their own roots, pot-grown, ready-to-plant, are the best Rose plants grown on this continent and, their splendid quality considered, they are by far the cheapest.

Hadley
Magnificent Rich Velvety Crimson

HADLEY MAGNIFICENT RICH VELVETY CRIMSON

In the Hadley we have a Rose that possesses a rich and lasting crimson color, coupled with vigor of growth, robust constitution, and free blooming habit. It will be welcomed alike by the grower who forces Roses under glass for cut flowers and the one who plants outdoors for summer flowers. It is a development of a strain of red Roses, including Liberty, General McArthur and Richmond. The color is magnificent, rich velvety-crimson, retaining its brilliancy throughout the season. The fragrance is delightful and refreshing. The flowers are borne on long stems and keep in good condition a long time when cut. The growth is splendid, sturdy and healthy, the foliage large and abundant. Price, one-year-old plants, 20 cents; two-year-old plants, 75 cents each.

MARIE GUILLOT

The Queen of White Roses

We recommend it as one of the most reliable white Tea Roses in cultivation, especially for outdoor culture. The color is pure white, sometimes faintly tinged pale yellow. The flowers are beautifully made, very large, full and double; the buds are very pretty of sweet fragrance. Anyone who has not seen this splendid variety growing at its best in the open ground can not conceive of the lovely beauty of its large, bold, handsome flowers. Price, one-year-old plants, 15 cents each; two-year-old plants, 50 cents each.

Marie Guillot

MISS MILDRED VESTAL

This superb new Rose is a result of a cross fertilization between "Rhea Reid," that grand red bedding Rose, and "Richmond," the greatest of all red forcing Roses, which insures in their offspring every point of excellence. It has magnificent large foliage, free from disease of all kinds, and is a tremendous grower—one of the best in all our list. The glory of the plant, however, is in the immense deep double flower of a new and clear shade of crimson scarlet. Price, one-year-old plants, 30 cents each; two-year-old plants, \$1.00 each.

RHEA REID

Grand, New, Hardy, Everblooming Rose

This novelty in Roses is a seedling variety of great distinctness of character. The growth is vigorous, throwing out long shoots with rich green leaves, and each shoot bearing a flower well above the foliage. It is a variety which will produce flowers as large as the American Beauty, as double as the grand Rose Bridesmaid, and as fragrant as the beautiful La France. The buds are long, oval and pointed, of a most beautiful rich crimson, and retain their form for a long time. This variety will immediately prove a most valuable addition to the list of forcing Roses, and will soon be seen in the show windows of cut-flower stores in our large cities. Of all the crimson Roses which have been introduced for years, there is none that has measured up better to the ideal standard than Rhea Reid. Highly recommended. Price, one-year, 20 cents; two-year, 75 cents.

Dear Sirs: I received my plants yesterday and am perfectly delighted with them. I surely do wish I had sent for some more such as Etoile de France and others. Please send me an envelope and order sheet, as I want to order some more plants.
Mrs. S. J. I., Hebron, Tex.

Gentlemen: I write to tell you that I got the plants you sent me and am well pleased with them.
April 21, 1921. Mrs. J. L. D., Gordon, Texas.

Madame Marcel Delaney

A surprisingly beautiful novelty raised by the introducers of the popular Rose Jonkhee J. L. Mock. It is distinct and peculiar in color, a pale soft pink or rose shaded with hydrangea-pink. The flowers are very large, full and fragrant, perfect in form and borne on rigid stems. The growth is vigorous and very floriferous. Price, one-year plants, 25 cents each; two-year plants, 75 cents each.

BRIDESMAID

One of the Most Beautiful of all Pink Tea Roses. This variety is valuable for cutting and does finely in the open ground; a sport from the old and popular pink Tea, Catherine Mermet, but of a fine, clear, dark pink, much deeper and more constant in color than Mermet. The bush is a strong, vigorous grower, bearing its flowers on long, sturdy stems. Altogether one of the finest Roses for garden culture and one which is a universal favorite for all occasions. Price, one-year, 15 cents; two-year, 50 cents.

THE BRIDE

Standard White Rose of Excellent Form and Color. There is no other white Rose more satisfactory than the Bride. The buds and flowers are unusually large, well formed and deliciously perfumed. When planted in the open ground the flowers are sometimes found to be delicately tinted with pink, making it exceedingly attractive. It is of a strong and healthy growth; and a profuse bloomer. Its blooms are of the most suitable form and quality for cut flowers. Price, one-year, 15 cents; two-year, 50 cents.

Jos. W. Vestal & Son, Little Rock, Ark.

Dear Sirs, I write this to say that I cannot find words to express my appreciation of the beautiful Roses I ordered of you of your own selection. They arrived in the spring in excellent condition and now they are blooming and they are all that you recommend. I am well pleased because they are true to name. So often I have ordered things from nurseries and they would be anything else except what I would order. You have my highest compliments. Would like to have a new catalogue as I expect to make a nice order this autumn. June 21, 1921

HOOSIER BEAUTY

The Most Beautiful Velvety Crimson Bush Rose in the World

This is the grandest and most beautiful Rose we have ever seen. No illustration, no description can give the faintest idea of the grandeur of this variety. It is simply exquisitely beautiful, wonderfully strong growing bush form, producing its gorgeous flowers in the utmost profusion all the time—a single plant will give an abundance of magnificent blooms this year. And such flowers! Deep, double, immense in size, gloriously formed, with a color seen in no other Rose, a superb velvety, crimson, rich beyond description. Seemingly nature outdid herself in this variety—every grace—every charm—a new color and to top it all off, it has the fragrance of the old Damask Rose, exquisite and indescribable. This is a marvelous Rose and we say again, the most beautiful we have ever seen in our lifetime. Ours is the true stock and, as the variety is new, we would suggest early ordering. Price, one-year, 20 cents each; two-year, 60 cents each.

J. W. Vestal & Son,
Little Rock, Ark.

Dear Sirs: Have received my last order of flowers and everything was in perfect growing condition. O. K. in every way. Thank you for being so prompt in filling my order and for all other past favors, Mch. 22, 1921. Mrs. R. W. T. Texarkana.

The bud, when first opening, is a beautiful shade of bright pink and the flower retains this perfect coloring until it drops its petals. Price, 15 cents each; two-year-old plants, 60 cents each.

NEW ROSE WM. R. SMITH

A Vigorous, Healthy Grower, Excellent in Quality and Beautiful in Bloom

Whether you live East, West, North or South, whether you wish one Rose or 1,000, here is a Rose which has our unqualified endorsement. It will thrive abundantly in almost any reasonable location. HARDY HYBRID PERPETUAL ROSES

All of Ironclad Hardiness. For Permanent Outdoor Planting. Selected for Those Who Want

Roses That Will Stand the Severest Climate and Give Satisfaction in Blossoms

This class of Roses are not ever-bloomers in the sense that we of the South understand them, but are recommended for their hardiness, immense fragrant flowers and to supply a demand for this class of Roses from a few of our customers. These Roses are especially suited to plant in all the Northern States; also in the colder parts of the State of Virginia, West Virginia, Kentucky, Tennessee, North Carolina, Arkansas, Missouri, Kansas, Oklahoma, Colorado and Texas.

Price of all Roses on this page, except where noted, first size plants, 30 cents each; any 2 for 50 cents; two-year-old plants, all on own roots, \$1.00 each.

VESTAL & SON.

Jos. Vestal & Son, Little Rock.

Gentlemen: My roses that I ordered from you are wonderful and every one of them very beautiful. On one bush this morning I counted 53 Roses just about half open and the bush is very attractive to all who pass by my rose garden. I inform them all that the roses all came from Vestal at Little Rock. I am living just next door to the Freeman hot house and Florist but none of his flowers come up to those I ordered from you.

Very truly,

Miss O. N. D., Ft. Smith, Ark.

DWARF POLYANTHUS ROSES

These are entirely distinct from the larger flowered Roses and there is a place for both in every garden, being so hardy and adapted to so many uses. Masses of 25 or more together will be found to make a very effective planting. Price of all Baby Ramblers listed on this page: One-year-old plants, 20 cents each, \$1.50 per dozen; two-year-old plants, 60 cents each; \$6.00 per dozen.

Anny Muller

This Rose is very much the same as the Crimson Baby Rambler, except in the color of the flowers, which are a shiny and brilliant pink, produced in the greatest profusion in large clusters. It is a splendid companion for the other excellent members of this family.

Maman Tourbat

A new dwarf bush Rose of the Polyantha class and a splendid one for bedding and growing in pots. The flowers are china rose tinted peach and saffron.

Pink Baby Rambler

Orleans Rose.

The showiest and prettiest of the pink "Baby" Roses; this charming and dainty little variety is of beautifully rounded habit and is a huge bouquet of brilliant bloom, deep cerise, with showy center of pure white, florets not crowded, but of beautiful arrangement.

Baby Doll

Flowers borne in Clusters, Highly Fragrant.

This delightful little "sweetheart" Rose is an everblooming Polyantha. The color is absolutely new, and quite startling in its brilliancy—golden-yellow tipped with clear, bright cerise. The little buds and blooms are perfect in form, elegantly finished and borne in small panicles or singly.

Baby Tausendschon

A dwarf form of the Climbing Tausendschon or Thousand Beauties. It has all the characteristics of the climber in the charm of its flowers, but blooming the entire season. Flowers firm, white, delicately flushed pink, changing to deep rosy carmine.

GRUSS AN AACHEN. Golden-rose with shadings of red; beautifully formed, well filled flowers; splendid for massing. Dwarf Polyantha.

EDITH CAVELL. Bright crimson; white eye; very beautiful.

Erna Teschendorff

The color of the flowers is the brightest red. The flowers are large and very double and are produced in constant succession throughout the whole season.

Mlle. Cecil Brunner

A popular cluster following bush rose flowers in coloring, rosy-pink on creamy-white ground. The variety is a free bloomer and a fine bedding sort.

Bonnie Belle

Enormous trusses of dark cherry-red flowers. Unusually long buds for a Polyantha. Worthy of trial.

Geo. Elger

A superb Polyantha Rose with just sufficient of Tea Rose blood to make it different from any in its class. It produces great quantities of lovely little buds of golden yellow, opening into miniature symmetrical Roses. Each bush is so loaded with blooms that they resemble a huge bouquet. Like all Roses of this class, it is free in growth and bloom, blooming all summer. Hardy everywhere with some protection. Foliage bright, attractive green. Excellent companion for the Baby Ramblers.

Jessie

This new Baby Rambler is an ideal Rose for massing, bedding or for pot culture. The flowers, which are produced in huge clusters, are of a bright, cherry-crimson color which does not fade. Superb. The best of all the Baby Ramblers for pot culture.

MARECHAL NIEL

The Famous Rose

The fame of the superb yellow Rose, Marechal Niel, with its large, deep, golden-yellow flowers, is world-wide. It is almost universally held to be the finest Rose for indoors or outdoors, where the climate admits of its cultivation. Its magnificent golden-yellow flowers are almost massive in dimensions, and reports from growers tell of single plants showing one to two thousand blooms at a time. It is of strong growth and beautiful foliage. It is grand in petal, shape, color, fragrance, lasting qualities and size, an extremely free bloomer and flowers throughout the season. Contrary to many Roses, which lose their color after opening, Marechal Niel decidedly improves and takes a deeper yellow after being kept for a day or two. The tea fragrance is strongly present in this Rose. It is a variety which practically stands by itself. Price, 20 cents each; stronger plants, 50 cents; two-year-old plants, \$1.00.

Climbing White Maman Cochet

Just as the old favorite White Cochet is one of the very best of all White Tea Roses, so we believe this new White Climbing Tea will jump into the widest popularity. It blooms continuously all summer, bearing the greatest profusion of perfect White Cochet Roses, and the plant grows with wondrous strength and vigor. This is without doubt one of the finest white everblooming Climbing Roses. Price 15 cents each; two-year-old plants, 75 cents each.

Climbing Pink Maman Cochet

No Rose we grow is so popular as Maman Cochet. Here we have an exact counterpart of that popular variety, except that it is a vigorous climber. All will welcome this new Rose. No word is needed to emphasize the value of this grand climber. Flowers are large, double and pink, like the bush Maman Cochet Rose. Specially recommended. Price, 20 cents each; two-year-old plants, \$1.00 each.

AMERICAN PILLAR

If ever there was a Rose constituted to stand the trying conditions of our American climate, we have it in this unique, hardy, free-blooming climber. It will thrive in poor soil as well as in rich, and insists on growing vigorously. It has stout, thick, curving branches, rather thorny, but furnished with an abundance of glossy dark green leaves. It is one of the first to start growth in the early spring, and here holds its leaves of lively green till far past Thanksgiving Day, and it is seldom troubled with insects. It begins blooming here early in May. Single flowers of rich, rosy pink approaching brilliant carmine, just a glint of white in the center, and long stamens of beautiful golden yellow. The blossoms—four to six layers deep—are arranged in large-flowered clusters all over the plant. We estimated certainly not less than 3,000 flowers on one young bush. A tremendous grower, with its thick vigorous canes, it is without doubt one of the most valuable single climbing Roses in existence and is unsurpassed for planting singly or as a hedge. In the autumn it is again a brilliant show of color with its pretty clusters of bright red seed-hips which remain on the bush until well into winter. Price, 20 cents each; two-year-old plants, 75 cents each.

FOR HEDGE PURPOSES

American Pillar makes strong canes that grow up right several feet before bending over, therefore a magnificent hedge can be made with this variety without the necessity of providing a support. Per dozen, one-year, 12 for \$2; two-year, 12 for \$8.

A HARDY EVERBLOOMING PINK CLIMBING ROSE

"CLIMBING COLUMBIA"

THE LATEST AND MOST BEAUTIFUL ROSE OF RECENT INTRODUCTION

Climbing Columbia introduced and offered for sale only by us. This Rose originated here on our place and no stock of it has yet been sold to any one. We control the entire stock of this magnificent Climbing Rose, so don't be misled by the claims of others. This Rose is a sport of the well-known Hybrid Tea Rose, "Columbia," and has all the desirable features of its parents, with a remarkable climbing tendency, growing 10 to 15 feet in a single season. Foliage deep glossy green, immune from disease and insects. Hardy in any location. Blooming with the greatest freedom the entire season. Equally as well in the far South as in the North. Buds and blooms of immense size, often measuring six inches in diameter, and perfect formation, borne singly on long shoots, thus making it an ideal one for cutting. Buds long and pointed, same as "Columbia," opening full and double. Petals large. Color, clear imperial pink with paler edges, beautifully dark veined; delightfully fragrant. This Rose has so many good qualities that we predict it will soon be one of the leaders in its class, and those who are fortunate enough to secure a plant of it this season will be able to enjoy its beauty and be the envy of their less fortunate neighbors for several seasons, as our stock is limited, and orders will be filled in rotation in which they are received. Price, strong first size or one-year-old plants, from 2½-inch pots, 60 cents each, 2 for \$1.00, postpaid. All grown on their own roots, and good, clean, healthy stock.

CLIMBING OPHELIA

A Climbing Sport of the Well Known Rose Ophelia

Ophelia stands today as the best Rose of its color—a delightful shade of salmon-flesh pink, shading to yellow at the base of the petals in the open flower, making it very attractive, a color lacking heretofore in Climbing roses. It grows well and blooms well. The growth is extremely vigorous, an established plant in good garden soil will develop growth to the extent of ten to twenty feet in a season and is sufficiently hardy to stand our average southern winters without protection. Nice one-year-old plants, 30 cents each; strong two-year-old plants, \$1.00 each.

DR. W. VAN FLEET

Dr. W. Van Fleet bears flowers which, when open, run four inches and over in diameter. The center is built high; petals beautifully undulated and cupped. The color is a remarkably delicate shade of flesh pink on the outer surface, deepening to rosy flesh in the center. The flowers are full and double, of delicate perfume, buds pointed, stems twelve to eighteen inches, and fine for cutting. The foliage is a peculiar shade of bronze green, large and glossy, with spines a bright bronze red. The variety is a vigorous grower, immune from mildew. Price, one-year-old plants, 20 cents each; two-year-old plants, 75 cents each.

SILVER MOON

The flowers run four and one-half inches and over in diameter, clear silver white in color, petals of great substance and beautifully cupped. The center is filled with bright yellow stamens, a very attractive feature. It is very floriferous, the plants literally covering themselves with great Clematis-like flowers. They are borne on strong stems, twelve to eighteen inches long, and are delicately fragrant. The foliage is large and abundant, bronzy-green, glossy and practically immune from mildew. Price, 20 cents each; two-year-old plants, 75 cents each.

CLIMBING AMERICAN BEAUTY

Here we have the latest triumph in American Rose growing, the true Climbing American Beauty in all its promise and glory, the realized dream of every Rose grower. Just the same as American Beauty practically. Large flowers, each produced on separate stems, vivid rosy-crimson in color, with delicious fragrance. Borne in the greatest profusion throughout the growing season. Foliage tough and leathery, deep, glossy green, sun and insect proof. The youngest plants attain a height of 10 to 15 feet in a single season. Hardy and as sturdy as an oak in all localities. Splendid in the South. TAUSENDSCHON, OR THOUSAND BEAUTIES

A Grand Hardy Climbing Rose

A beautiful, new climbing Rose which has leaped into popularity by its inherent merit and beauty. The name, "Thousand Beauties," is very appropriate and refers particularly to the wonderful variety of colorings found on any one plant. The flowers are soft pink at first, but as they age the most beautiful shades of carmine-rose, cerise, blush and soft white with a gleam of light yellow, soft crimson and intermediate tints; a combination of charming coloring, which is bewildering. FAMOUS RAMBLER ROSE

DOROTHY PERKINS (Pink)

This beautiful new Rambler Rose is becoming even more popular than the original Crim-son Rambler. And well it may, for it is indeed a finer pillar Rose than that famous variety. The growth of a single season is wonderful, its handsome, glossy green foliage being one of its strong points. The flowers, however, are its crowning beauty, being borne in im-mense clusters of fifteen to thirty, and possess great lasting qualities. Flowers a beautiful shell-pink, very double, with petals artistically crinkled. Remarkably pretty pointed buds.

This Rose is extremely hardy and will withstand the coldest weather. We advise our friends to plant this variety where it can be allowed plenty of room, and it will give an account of itself. Price, one-year-old plants, 15 cents each; two-year-old plants, 60 cents each.

EXCELSA

New Fiery-Red Rambler Rose

A splendid new Climbing Rose, remarkable in many ways, but particularly in the brilliant fiery-red or intense crimson-scarlet of the flowers. The in-tensely brilliant color is accentuated by the great masses of giant trusses pro-duced on the plants, and furthermore by the contrast with the deep green glossy foliage. The flowers are very double; they are larger than any of the Rambler Roses and borne in trusses of thirty to forty on each; the body of the flower is brilliant in color, but toward the edges of the petals they light up with a wonder-ful scarlet-crimson. Price, one-year-old plants, 15 cents each; two-year-old plants, 60 cents each.

WHITE DOROTHY

A White Climbing Rose of Indescribable Charm and Vigorous Growth.

This wonderful Climbing Rose is so exquisitely beautiful that it is well worth all the prominence it can be given. It is a rampant grower and in a remarkably short time will cover a large trellis with shining foliage of splen-did texture and free from mildew or at-tacks of insects. The flowers are of a brilliant, glistening white and are borne in great trusses, completely covering the plant, until it resembles a snow drift. Price, one-year-old plants, 15 cents each; two-year-old plants, 60 cents each.

Paul's Scarlet Climber

It is not a Rambler, but an Entirely Distinct Hybrid

and without question the most important addition to our list of Climbing Roses in many years. No other Rose in any class can compare with it for brilliancy of color, which is a vivid scarlet that is maintained without burning or bleaching until the petals drop.

The flowers are of medium size, semi-double, very freely produced in clusters of from three to twenty flowers each on much branched canes, the plants being literally covered with flowers from top to bottom. It is of strong climbing habit and perfectly hardy. Price, 30 cents each; two-year-old plants, \$1.00 each.

Climbing Gruss An Teplitz

A climbing form of Gruss an Teplitz. Unquestionably one of the finest climb-ing Roses ever introduced. The color when first opening is very dark rich crimson, quickly changing to bright scar-let, shading to velvety fiery red. The flowers are very showy and handsome. Remarkably healthy and vigorous; almost immune from all diseases. Price, one-year-old plants, 20 cents each; two-year-old plants, 75 cents each.

You Surely Have a Place

Grow them on walls to hide unsight-ly buildings, on tops of banks to hang over the retaining walls; use them in tree-form and have one at every fence post around your place.

The foliage is very beautiful in many of the good newer sorts, and shows a great variety of markings and fine combinations. It is used in great quantities in private places, in small gardens and in the public gardens and parks. The Coleus is used to best advantage in planting in ribbons of color in the borders along drives, in beds of various shapes, such as stars, crescents, triangles, circles and squares, as the foliage, being of such various colors, can be used with striking effect. Light colors against dark, with borders of contrasting color, which are easily obtained among the yellow, red, striped, mottled brown, blue-black, plum and other colored sorts, secure effects when used on a fine lawn or in the border, hard to make with other plants.

BEAUTIFUL DECORATIVE FERNS

These beautiful plants for home decoration vie with the Palms for first place in the esteem of flower lovers. They are finely cut and oddly shaped. Ferns give a graceful effect produced by few other plants and they do exceedingly well in the parlor and conservatory. The Nephrolepis family, of which the well-known Boston is a member, has furnished us many beautiful species of late years. We recommend all the varieties listed.

THE BOSTON FERN. This popular Fern has proved one of the best decorative plants of recent introduction. The fronds are much larger than the Sword Fern, and do not stand so stiff, but droop gracefully. Excellent for making large specimen plants, also for hanging baskets. Price, nice young plants, 15, 25 and 50 cents each.

Boston Fern

COMPACT SWORD FERN. Fitting companion for the Boston; dwarfier, more erect in growth, much darker shade of green, very gracefully arched. Very desirable as a house plant. Price, 15, 25 and 50 cents each.

NEW FERN JOHN WANAMAKER. Long, narrow gracefully drooping fronds. It is not so compact in growth as Scholzeii, and therefore does not decay in the center, and is a durable house fern. It is a rapid grower, making an abundance of fronds, and is quite distinct from any other Fern. Price, nice plants, 25 cents each; larger plants, 50 cents each.

WHITMANII (Ostrich Plume Fern). More of a dwarf habit than the Boston Fern. The fronds are of entirely different nature. Each frond is subdivided on the order of the Compacta Fern, thus producing a very beautiful effect. Its decorative ability is excellent. Prices, 15c, 25c, 50c, 75c and \$1.00 each.

SMITHII FERN. A greatly improved Ostrich Plume Fern, with extremely finely cut fronds, could be rightly described as Baby Breath Fern. It is of compact form, fronds on wiry stems that do not break down in center. This variety will have a wonderful sale. Prices, 35c, 50c, 75c and \$1.00 each.

VERONA FERN. Makes a good plant in any size, much finer frond than any crested Fern except Smithii. We consider it one of the best of the newer varieties. Prices, 25c, 50c, 75c and \$1.00 each.

NORWOOD FERN. A dwarf compact form of Whitmanii, carrying its fronds stiff and erect on wiry stems that do not break down. Makes ideal specimens. Called by some florists Fluffy Ruffles Fern. Very showy. Prices, 35c, 50c, 75c and \$1.00 each.

ASPARAGUS FERNS

Their beautiful sprays of lovely, feathery foliage can be cut freely for bouquets, etc.

ASPARAGUS SPRENGERII. Emerald Feather. Very valuable for vases and baskets. A strong, vigorous plant, very easily grown and requires little care. Price, 15 cents and 25 cents each.

ASPARAGUS PLUMOSUS. Climbing Lace Fern. An extremely graceful window climber. The fine, feathery foliage is always bright and green. Price 15 cents and 25 cents each.

TRAILING VELVET PLANT

RUELLIA MOKOYANA

This is a charming indoor plant for culture in pots or may be used in vases and baskets; of bushy spreading habit and finely marked leaves, which are beautiful olive-green, delicately veined with silver and rich purple underneath. A neat and handsome plant, always bright and pretty. The flowers are exceedingly beautiful, trumpet shaped, and of a rosy-lavender color, almost covering the plant in their great profusion. Price, 20 cents each; three for 50 cents.

Ruellia Mokoyana.

Trailing velvet plant, Ruellia. Very showy.

GYNURA AURANTIACA

Velvet Plant

Velvet Plant seems an appropriate name, the leaves being always taken as artificial. They and the stems are entirely covered with purple hairs; shining, glistening, reflecting many new colors. Any change of position appears to alter the color of the foliage. Price, 15 cents.

NEW MARGUERITE

MRS. F. SANDER. Unlike all other Marguerites, its color is of the purest glistening white throughout; in size it frequently measures five inches across; the center of the flower is a mass of closely arranged fringed florets; these are surrounded or edged by the broad, shining white ray-petals, forming a flower which reminds one forcibly of a glorified double Pyrethrum. These are produced on long stems with a freedom not known in other varieties of the Marguerite. Price, young plants, 15 cents each; four for 50 cents.

BRAZILIAN PLUME PLANT

(Justicia Carneia)

This plant is a native of Brazil and of the easiest possible culture, and seems to do equally well in all kinds of soil, and in any situation, requiring but very little attention; it is, in fact, one of the few plants that everyone can grow successfully. It is a strong, rapid grower, and throws long shoots, each of which is tipped with the beautiful pink, plume-like flowers, the ends of every petal drooping in a most charming manner. This new sort begins to bloom when the plant has only three or four leaves and is never out of flower afterward. If pinched back occasionally it makes a very dwarf stocky plant, frequently covered with 20 to 50 large pink flower-heads, lasting a long time. The foliage is also more persistent and highly ornamental, being heavy in texture and very velvety. Price, 30 cents each.

MAGNIFICENT NEW CANNAS

We offer the following magnificent new Cannas, improvements on existing varieties and sure to please all admirers of fine new sorts. These show the great improvement being made in this popular plant. In profusion of bloom they are remarkable; beginning early in summer they send up shoot after shoot, thus continuing in flower all summer. It is no exaggeration to say that the flower spikes, in size, richness, and diversity of color, are equal to many varieties of Gladiolus.

THE PRESIDENT

By a sweeping majority, this Canna won the honor of being named "The President," for it is so surpassingly fine that no other red Canna could be a competitor. In color, it is a rich, glowing scarlet, and the immense, firm, rounded flowers, 7 inches across when open, are produced on strong erect stalks well above the large, rich green foliage. The President is superior to any other red variety in the quantity and also quality of bloom, and the firm flowers are able to resist drought and heat to a remarkable degree. "This is one of the most marvelous Cannas ever produced." Price, 30 cents.

NOKOMIS

Like The President, this is a hybrid of the famous Fire-bird. The foliage is a combination of emerald-green and bronze, beautifully veined, making a lovely setting for the large, vivid crimson flowers. These flowers are most attractive, having a rich silky sheen on the petals and the color is darker than that of any other bronze-folliaged Canna. Price, 30 cents each.

FIERY CROSS

This new variety is one of the most successful flaming reds obtainable in the taller growing kinds. The foliage is full and healthy, a rich bluish green; plant and flower spikes attaining a height of five to six feet. Flowers large, 15 to 20 showing at one time. Color, crimson scarlet. Price 30 cents.

Any four Cannas on this page for 90c, or, all six Cannas described and illustrated on this page for \$1.65. A grand offer of the best varieties grown.

DRUID HILL

A striking dark-stemmed, deep red-flowered beauty. It has most distinct characteristics. The plant has ebony-red stems and is well furnished with Black-Beauty foliage of more than usual grace. Such a setting makes doubly effective the well-poised heads of rich crimson bloom. Average-sized flowers, but a color combination as yet unmatched. Price 30 cents each.

HUNGARIA

A magnificent pink Canna widely used for large solid beds. The petals are large and waxy, made up into big round, full trusses. Its color forcibly suggests the well known Paul Neyron Rose, and is unquestionably one of the most popular pink Cannas ever produced. Price, 30 cents each; \$3.00 per dozen.

CITY OF PORTLAND

The color is a beautiful glowing pink, deeper in color than its parent, Mrs. Alfred P. Conard, and the flowers are produced in greatest profusion on strong, erect, branching stalks. It is an early and continuous bloomer, blooming freely in hot or cool weather. Canna experts last season pronounced it the "finest all-round pink Canna to date." Price, 30 cents each; \$3.00 per dozen.

How to Plant Cannas in a Circular Bed

Start with one plant of a tall growing habit for the center. Draw a circle 18 inches from this one and use a dwarfier variety for this circle, which will require 6 plants; then draw another circle 18 inches from the first circle, or 36 inches from the center, and use a still dwarfier variety for this circle, which will require 12 plants, and plant each succeeding circle in the same manner. Each succeeding circle will require 6 more plants, set 18 inches apart, which is the proper distance, than the previous circle; thus, 1 plant for the center, 6 plants for the first circle, 12 plants for the second circle, 18 plants for the third circle, and so on. A bed 4 feet in diameter will require 7 plants; a 7-foot bed, 19 plants; 10-foot bed, 37 plants; 16-foot bed, 91 plants. For the best effect plant beds in all one variety, as the sloping effect can be secured by making the soil in the bed higher in the center and sloping to the edges. For border around the beds use Acalphos planted 12 inches apart. Price, \$1.50 per dozen.

CHAS. HENDERSON

Rich, crimson flowered Canna. A splendid dwarf, compact grower, throwing up direct, compact heads of bloom of immense size. The individual flowers are among the very largest. Color, dark crimson; center of the flowers marked with gold penciling. Price, 15 cents each; \$1.50 per dozen.

BRANDYWINE

Makes a luxurious growth of dark bronze foliage and a magnificent display of fine, large flowers. Color is intense vinous red, beautifully dappled with deep crimson; two or three petals are sometimes narrowly edged with bright gold. Price, 20 cents; \$2.00 per dozen.

THE WONDERFUL CANNA

MME. CROZY

Color is a brilliant vermilion-scarlet, bordered with deep golden-yellow; the flowers are borne erect in great heads and in such profusion that they crown the plant with a blaze of glowing color. Price, 20 cents each; 3 for 50 cents; 6 for 90 cents; \$1.75 per dozen.

DAVID HARUM

Bronze leaved; flowers of bright vermilion-scarlet, mottled with deep red. Plants, 20 cents each; \$2.00 per dozen.

GAIETY

Reddish-orange mottled with carmine and edged with yellow. The tongue is yellow and densely spotted with carmine. Price, 20 cents each; \$2.00 per dozen.

DRAGON

An incessant bloomer which keeps sending up new bloom-stalks until cut down by frost. Dark ox-blood red. Price, 30 cents each; \$3.00 per dozen.

MRS. ALFRED F. CONARD

This has become the most popular pink Canna ever introduced and it is unsurpassed for planting either singly or in large beds. Its exquisite salmon pink flowers are of largest size. Wonderfully profuse in blooming, large heads. Price, 30 cents each; \$3.00 per dozen.

LOUISIANA

The flowers are like beautiful orchids, size often more than seven inches across, and every inch a vivid scarlet. A tremendous bloomer. Price, 15 cents each; \$1.50 per dozen.

METEOR

A glorious red variety, or, to be exact, a deep crimson. It makes fine large trusses and blooms constantly. The effect produced by the brilliant colored flowers is very striking. Price, 20 cents each; \$2.00 per dozen.

LAFAYETTE

Resembles the famous "Meteor," but the flowers are a more intense scarlet. The heads of bloom are carried erect above the healthy, green foliage, producing a brilliant effect in mass planting. Price, 20 cents each; \$2.00 per dozen.

SOUV. D'ANTOINE CROZY

The color is an intense scarlet bordered with a band of deep golden-yellow. The foliage is broad and deep green. It grows about three to five feet in height, making a fine variety for the border of beds. Price, 20 cents each; \$2.00 per dozen.

WYOMING

A beautiful Orchid-flowering variety, with rich purplish bronze foliage. Flowers are large as King Humbert, and of good substance; bright orange, slightly rimmed and flaked with rose. Price, 15 cents each; \$1.50 per dozen.

RICHARD WALLACE

A tall growing, wide flowered, heavy trussed canary-yellow, the largest and best of its color; bleaches very little. The longer we grow this variety, the more we are convinced it is the best all around yellow Canna we ever had. Price, 15 cents each; \$1.50 per dozen.

High-grade Cannas have for years been one of our leading specialties, and our fields the past season were a gorgeous riot of color from June to frost, and were admired by many visitors. To those who stopped to look closely at individual varieties, the wonderful improvement in Cannas was very manifest. No other bedding plant will give the same uniform good results in our varied and trying climate. They do well in all sections of the country and stand pre-eminently at the head of the list, succeeding in any sunny position in any kind of soil, but responding quickly to liberal treatment. For best results the beds should be spaded two feet deep and a generous amount of well-decayed manure of any kind thoroughly incorporated, and at all times supplying water freely. For best effect plant in large masses of one color, setting out the plants two feet apart.

MORNING GLOW

Another color contrast of more than usual picturesqueness; foliage an olive-green striped and veined with bronze. A greatly improved descendant of Evolution, with well-mounted flowers of exquisite, soft shell-pink and orange-red center. Price, 30 cents each.

JUANITA

Bronzy orange-color with golden bronze foliage. An exceptionally attractive flower. Price, 30 cents each.

WABASH

Beautiful large, carmine-rose flowers, freely produced; the bronze foliage, combined with the pink flowers, produces an unusual and pleasing effect. An unusual Canna. Price, 25 cents each.

VENUS

An exceedingly beautiful variety, at once the most delicate in coloring and texture, and as vigorous and long-seasoned as any Canna grown. Long, erect stems bear trusses of large size, perfect form and ever-clean freshness. The large, oval petals are exquisitely variegated; warm rose-pink, mottled near center, and edged with creamy-white. Makes a very pretty cut flower. Price, 20 cents each; \$2.00 per dozen.

TITANIC. Very large, as the name implies, even surpassing Wm. Turner in this respect. Probably the largest white, and of the easiest culture. Pure white in color, very broad, and deep flowers measuring fourteen inches in diameter.

WILLIAM TURNER. Pure white bloom, incurved and very large. One of the finest of the large-flowered Chrysanthemums and a general favorite. This variety is grown commercially and we have a large stock prepared for the cut-flower grower.

YELLOW WILLIAM TURNER. The yellow sport sent out by Smith is the variety we offer. It was selected by us from the many sports of William Turner as being the brightest yellow. It is an excellent variety and will rank as one of the finest for exhibition use.

GOLDEN ELBERON. Identical with the original, or pink Elberon, in every respect except its color, which is yellow and is equally useful.

MRS. J. LESLIE DAVIS. A very pleasing shade of pink, a sport from Wm. Turner, and in every way identical except that of its color.

WHITE ELBERON. A white sport from Elberon. In other respects is identical. One of our best varieties.

ORANGE QUEEN. Growers have been ten years striving for this color—a burnt orange, closely resembling that of Butterfly Weed. Admired by everyone and coming at Thanksgiving time, its color is in keeping with the season.

CHRISTY MATHEWSON. Of largest size, eight inches in diameter and six and one-half inches deep. In early development it shows an eye, but continues to produce more petals day by day until the center is filled. Pure white. Strong wiry stem.

WHITE CHIEFTAIN. We are sure that this will take the position among white that Bonaffon holds among yellows; it will prove the ideal white. Like its parent, it holds in fine condition for a long time; the blooming period runs over three weeks.

CULTURAL DIRECTIONS FOR CHRYSANTHEMUMS, WHICH, IF FOLLOWED, WILL INSURE SUCCESS

WHEN TO PLANT. Any time after the ground can be worked, even up to June 20th, will give you good blooming plants in the fall.

SOIL. Dig the ground deep; put in quantities of manure. The Chrysanthemum is a gross feeder; if fed well the flowers will be large and the plant strong.

DISBUDDING AND STOPPING. When your plant is eight inches high cut back to a height of six inches. Allow four shoots to grow from this main trunk. When these four shoots are four inches high, pinch out the terminal bud and save three or four branches that will spring from each of these limbs. Allow these last branches to attain a height of nine inches, then pinch back for the last time. Allow one bud (flower) to each stem, and that a terminal bud.

WHEN TO LIFT. In localities subject to heavy frosts in

October or November plants should be lifted into large pots or boxes by September 1st. After lifting drench thoroughly, and never allow them to suffer for water. Give manure water, if possible, once a week. If protected from frost by sheeting, they need not be brought into the house till well into October, and when brought in place in a room without fire; give plenty of air when not frosty. In cold climate winter in cellar.

BLACK APHIS. Nothing destroys this troublesome insect so easily as clean cold water dashed on forcibly with a syringe.

Each year the taste for Chrysanthemums becomes more exacting, and to meet it we offer only the finest exhibition and cut flower varieties—sorts that are noted the country over.

To all such we would recommend this collection. It will contain such varieties as are most suitable for bedding. Unless ordered otherwise, each collection will contain all different varieties, about half each of double and single varieties, but they will not be labeled. Order early and pot them so that you will have good, strong, well-established plants by the time the ground is in condition for bedding out, and you will be rewarded by an abundance of flowers throughout the season. Remember, these are not rooted cuttings, but are all strong, well established plants, that have been grown in pots. Price, 5 for 50 cents; 12 for \$1.00; 100 for \$5.00.

Greeting

NEW EVERBLOOMING PELARGONIUM EASTER GREETINGS

The flowers of Easter Greeting have the large size and the gorgeously rich coloring of the "Lady Washington Geranium." To this is added, in Easter Greeting, the habit of continuous blooming, which has made the ordinary bedding Geranium so highly valued. Easter Greeting is the first of a new race and one of the most valuable introductions in recent years. As an Easter plant it rivals the Azalea; but unlike the Azalea, Easter Greeting will remain in full bloom all summer. Each 20 cents; larger, 35 cents.

APPLE-SCENTED GERANIUMS

There are few, indeed, who are not acquainted with this grand old favorite. A plant of it will fill a room with its delicious odor, which is precisely like the fragrance of apple blossoms. Price 20 cents each.

OUR SUPERB PANSIES

Pansy plants planted in the spring as soon as the frost is out of the ground will begin to bloom at once, and afford daily pleasure for a month before Coleus or Geraniums could be even planted. If snow should fall after planting they would not be hurt. In fact, to get the best results from Pansies, they should be planted just as early as they can be. To get best results and extra large flowers, the soil must be extremely rich—we use equal parts well rotted manure and soil. Price, 5 cents each; 50 cents per dozen; \$3.00 per 100.

CARE OF FERNS

The rule to be observed in watering ferns is to water them when soil is dry and then thoroughly. More Ferns are ruined by over-watering than any other variety of plant. Unless they are placed in a dry, sunny spot, little water is required. Constant, steady watering causes stagnant, sour soil and for this reason it is necessary to give opportunity for drying out, to keep soil sweet and pure.

For scale or fungus secure Whale Oil Soap and make a solution of one-fourth pound to two gallons of water and wet foliage thoroughly. Cover entire plant with cloth to keep the fumes from escaping and the evaporation of solution.

Once a year is sufficient to repot plants. March or April are the best months. Fertilizer is necessary for all ferns.

LARGE DOUBLE FLOWERING PEONIES

Once planted they will last a lifetime with little care. They grow from one to three feet high, producing magnificent blooms, which sometimes almost surpass the beauty of the Rose. Another point which is largely in their favor, is the fact that the plants are never attacked by either insects, animal or fungal diseases. Peonies will succeed in most any kind of soil, but give best results when planted in a deep, rich and somewhat moist loam.

SOME SHRUBS THAT BLOOM

In corners of the grounds, at curves in walks and driveways, and at the house foundations are excellent places to plant shrubs. They should always be in groups, unless their ultimate size will be quite large. Lilacs may be used in specimen plantings, but low-growing shrubs, such as the Spireas, etc., should be set in clumps. In grouping it is always good policy to plant the taller growing varieties back of the lower sorts. This gives a "step-down" effect, and seems to join the house to the lawn.

Good Packing Pays—Pays Us As Well As You, Our Customers

Our system of shipping costs us much more than ordinary methods of packing—but it insures delivery of trees to you in perfect condition.

We box, pack and bale with great care. We always paper line the boxes. This preserves the moisture of the moss packed around the roots.

Furthermore, all our trees are packed by men who have years of experience in this one work alone. Most of them have been with us since youth. Their long experience has given them the essential "know how" that assures satisfactory shipments.

THRIFTY FRUITS FOR EVERY MAN'S GARDEN

LITTLE COST, LITTLE SPACE, LITTLE LABOR, AND BRING BIG RETURNS

When you plan a home garden, nowadays you have to consider what will give the best returns for the space occupied. These fruits all "earn their keep" and more, for from a single grape-vine, well matured, it is easy to get at least a bushel of luscious fruit for eating or preserving for winter. Blackberries and raspberries also produce fruit bountifully. Plant at least a dozen of a kind and plant wherever space can be found.

LARGE, LUSCIOUS GRAPES

Price, 40 cents each;

AGAWAM. Berries very large, with thick skin, pulp soft, sweet and sprightly, very vigorous, ripens early.

BRIGHTON. Large compact bunches, rich wine color, tender and almost seedless, sugary, juicy and rich flavor. Having thick foliage, it is enabled to withstand the heat of summer. We recommend this variety for vineyard or garden.

Train on an arbor or trellis and never trim. The product is very large and cultivation reduced to simple form. Price, two-year-old vines, 60 cents each.

DEWBERRY VINES

The Dewberry is closely related to the blackberry, but larger and much earlier. Some remarkable profit-records have been made with the Dewberry where there is a demand for an earlier and larger berry than the Blackberry.

LUCRETIA. The Lucretia is the best of all the Dewberries, glossy black, very large, coreless, juicy and sweet. The

vine is vigorous and spreads over the ground. Fruit ripens about ten days to two weeks before the Early Harvest Blackberry. Price, 6 for 75 cents; 12 for \$1.00.

BLACKBERRIES

EARLY HARVEST (Very Early Blackberry). The Early Harvest is the very first Blackberry to ripen. Fruit medium size, roundish, oblong; flesh is soft, juicy, mild, pleasant, tender and very good. The vine is vigorous, upright and hardy.

ELDORADO (Mid-Season Blackberry.) The Eldorado is a large, oblong, conical berry; small seeds and core; flesh tender, sweet and juicy. Jet black color when ripe. Vine is upright, hardy, vigorous and productive.

SNYDER. One of the hardiest, most dependable Blackberries. Good quality, good size, good shipper. Can always be depended upon. Price, 6 for 75 cts.; 12 for \$1.25; 100 for \$7.50.

NON-WARRANTY. While we hold ourselves in readiness, on proper proof, to replace free of charge all trees, etc., that may prove untrue to label, or refund the amount paid, we give no warranty, expressed or implied, as to description, quality, productiveness or any other matter of any Nursery stock, seeds, bulbs or plants we sell.

OUR GUARANTEE. All goods are guaranteed to reach you in good condition; mistakes, if made, will be promptly rectified. Accept shipment, examine and count on receipt and notify us at once should there be any errors and the carrier as well, if any damaged stock. This guarantee not good unless above requirements are complied with. **WE DO NOT GUARANTEE GROWTH.** Remember a tree, shrub or plant is a living organism, as much as a cow, horse or man. It breathes, drinks and feeds and is liable to attacks of disease and insects. At prices we sell, it is impossible for us to guarantee growth or to be responsible for stock after delivery to our customers in good condition.

THREE BEST RASPBERRIES

This fruit comes in just after Strawberries, and when properly cultivated is quite prolific. Plant on strong soil, fertilize freely, and mulch heavily. Pinch off canes when three feet high, tie up and cut out old wood each year. Price, six for 75 cents; 12 for \$1.25; \$7.50 per 100.

THE GREAT COLUMBIAN RASPBERRY. Hardy and vigorous, often growing eight to ten feet in a season, and standing any degree of frost and drouth. It is propagated by tips, and its productiveness is most astonishing. We know of no variety that can compare with it. The berries are large, dark purple, firm as to texture, with an agreeable, pure, rich flavor, which is brought to its highest flavor when canned or cooked. The most prolific of any sort known, the fruit fairly hanging in masses. A row or hedge of it is a sight to behold.

CUTHBERT RED. Scarlet crimson, large, conical, handsome, firm and juicy. Canes are strong, vigorous, upright and hardy. The best and most widely planted red Raspberry for home gardens.

CUMBERLAND. A healthy, vigorous grower, throwing up stout, stocky well branched canes that produce immense crops of magnificent berries. Fruit very large, firm, quality about same as Gregg, keeps and ships as well as any of the blacks. The most profitable market variety. Mid-season.

NOTE.—Please bear in mind that when our big shipping season is on it is impossible to keep up with our correspondence and orders. We ask our friends to be as indulgent as possible. In order to expedite correspondence, when you write us about anything please enclose a stamped envelope or post-card with your name and address written plainly.

In shape the berry is conical and long, having an obtuse point. In color it is dark, lustrous shade of crimson, and is studded with brilliant, golden seeds, all of which tend to make it one of the handsomest berries.

VESTAL'S EARLIEST STRAWBERRY

Of all Strawberries in our list, this ripens the earliest, producing an abundance of perfectly round, beautiful berries of very rich and delicious flavor. In fact it is one of the most productive varieties we have and as it ripens so extremely early it is the favorite home garden variety and also for the large grower, as the market price of the fruit is often 20 cents per quart. A delicious table berry and one of the very best for family use. Price, 25 for \$1.00; 100 for \$2.00.

FALL BEARING STRAWBERRIES

Fall-bearing Strawberries seem to be no longer an experiment, as they are becoming essential all over the country, and are making good every place they have been tested. If these varieties are disbudded, until say August 15 to September 1, and allowed to fruit, they will give large quantities of ripe berries until checked by hard freezing. The variety we offer we consider the best. Price, 25 for 75 cents; 50 for \$1.25; 100 for \$2.00, postpaid.

PROGRESSIVE. This is the strongest growing plant of all the fall-bearing varieties we have seen. The plants are very large and heavily rooted, producing a phenomenal crop of medium to large fruits, of a dark red color both inside and out.

SELECTED VEGETABLE PLANTS

This page and the next one tell you how you can have a successful vegetable garden without waiting for seeds to grow. If you buy the plants from us, ready started, you gain over a month, and have a supply of fresh, crisp, choice vegetables for your table almost before you know it. What a joy it is to step out from your kitchen door and gather from your own yard the vegetables you want, in all their original freshness and delicious goodness!

A few Artichokes; some choice Tomatoes; a sprig or two of Parsley—possibly a Cabbage or Cauliflower, and there's your meal. Such vegetables are not dust covered. Not dried and withered. Not stale and unappetizing. Not handled three or four or five times before they reach you. But clean—and palate-pleasing—right from your own garden to your own table. You don't need a lot of ground in which to grow a home supply. A few square feet of garden is enough. Order a few plants of the varieties you prefer and you will have fresh vegetables at your command all the year round.

When plants like these are so easily grown—and when the cost of living is so high today—we can not understand why every housewife does not grow her own vegetables. The cost of growing is practically nothing—and one can not buy such vegetables as one can pick from one's own garden patch.

Snow on the Mountain

JAPANESE MORNING GLORIES

Japanese Morning Glories
MIGNONETTE

RED GOLIATH. One of the finest, being of strong growth, healthy and deep-rooting. The average spikes of flowers are immense, measuring six to eight inches long by two and one-half inches in diameter, and are compactly filled with giant florets, measuring one-half inch across and packed full, even in the center, with anthers, or three times as many as the older Mignonettes contain, consequently this variety is correctly called a double Mignonette. The color of the florets—fire-red—is strengthened on account of the density of the florets and spikes, thus presenting almost solid columns of brilliant red, effectively contrasted against the healthy, rich green foliage. The fragrance is delightfully rich and powerful. For cutting it is perfect, remaining fresh for 8 to 10 days in water. Price, 15 cents.

NEW GIANT WHITE MIGNONETTE, WHITE PEARL. This variety is of strong, robust growth, producing in great abundance large conical heads of pure white flowers. Price, 10 cents.

But the surpassing charm of these "Giant Japanese Morning Glories" lies in the entrancing beauty and large size of the flowers; they measure from 3 to 4 inches across. The colors of the flowers, shadings and markings are limitless. Some flowers are of deep, rich, velvety colors, others daintily tinted and shaded. There are reds from soft rose to crimson and garnet; daintiest blue to purple; snow-white to silver-gray, new terra cotta and coffee-colored shades. Some flowers are striped, blotched and spotted; others have magnificent edges and throats.

OF GRANDIFLORA, OR LARGE FLOWERING
SWEET PEAS

This superb mixture is our special pride. During the several years we have sold it, it has been our constant aim to improve and perfect it. It embraces the finest American and Eckford varieties, as well as the latest novelties, and will produce a great abundance of giant flowers of beautiful colors. Some are edged, mottled, blended, flaked and striped. Without exception, this is the very finest mixture it is possible to make. We recommend that our customers buy these seeds by weight and plant liberally. **Price, per packet, 10 cents; ounce, 20 cents; pound, \$2.00.**

VESTAL'S SPECIAL BLEND SPENCER SWEET PEAS

If planted now they will blossom forth in a riot of brilliant beauty during May and June

Among recent Sweet Pea novelties there has appeared nothing finer than the new race of Orchid Flowering or Countess Spencer Peas.

They are distinguished for their gigantic size—usually measuring two inches across. The bold, erect standards, which are uniformly waved, crimped and fluted in exquisite fashion, the charming blending of harmonious colors, the long stems, which make them excellent for cutting; the great profusion of flowers and the large number on the stems, usually three or four, make this type so superior in every way that we believe it is certain to supersede the old varieties.

The Sweet Peas in our **SPECIAL SPENCER BLEND** are made up of the finest named Spencer varieties and range in color from the purest white to shades of pink, lavender, blue, yellow and crimson, and are just the kind to make your garden a success.

It is the very best blend possible to produce and will surely delight all who want a great variety of colors. **Price per packet of 110 to 125 seed, 20 cents; per ounce, 40 cents, postpaid.**

TWO YEAR OLD ROSES

The demand for our Two Year Old Roses is constantly increasing, and we are fully prepared this season with an extra fine stock of choicest varieties, which will be found fully described elsewhere in this catalogue. These Two Year Old Roses are so large that they cannot be sent by mail, but must go by express, and the purchaser pays the express charges; but we are careful to pack as light as the safety of the plants will permit, and always add as many extras as we can afford to help pay the charges.

Two Year Old Roses weigh when packed about as follows: 12 plants, 20 pounds; 25 plants, 35 pounds; 50 plants, 50 pounds; 100 plants, 75 pounds. This includes the earth left on roots, which is quite necessary to Roses of this size; if all the earth is shaken off the plants may be hard to start and slow to bloom, and this is one reason why Two Year Old Roses should always be sent by express.

SPECIAL BARGAINS IN TWO YEAR OLD ROSES

Persons who will leave the selection of varieties to us, we will make up choice collections same as if for ourselves, and guarantee to please; all correctly labeled, packed and delivered to express here as follows:

12 CHOICE VARIETIES, 1 EACH, PRICE.....	\$ 5.00
25 CHOICE VARIETIES, 1 EACH, PRICE.....	9.50

IMPORTANT. Owing to our knowledge of varieties, we can usually make a better selection for our customers than they themselves could make. Where the selection is left to us, we shall send the very best sorts, those that we think will give the best results in the locality where they are to be planted. We shall be glad to know, however, if the purchaser has any preference as to varieties, in which case the kinds selected will, if possible, be included.

Six Garden Collections of Ever-Blooming Roses

FOR BEDDING OR INDOOR POT CULTURE

Our list of ever-blooming Garden Roses, described and illustrated on the following pages, will, we trust, find favor with our customers. While it contains some of the most satisfactory varieties of recent introductions, it also contains sorts which have made a reputation for themselves as splendid bedding varieties.

As is our custom in making up collections for our customers, we have selected varieties showing marked contrasts in color combined with hardiness, vigor of growth and abundance of bloom, so that purchasers in obtaining one or more of these collections may rest assured that they procure sorts which, although limited in number, will give them a variety unexcelled in all the prime qualities of the best Garden Roses.

Our Garden Roses are famous throughout the country; they give universal satisfaction, as is evidenced by the number of orders and congratulatory letters we receive annually from purchasers. Even the smallest size will, under ordinary conditions, give an abundance of bloom the first year, but the larger sizes will, of course, bloom earlier and more profusely.
